

Dear FCC,

* I support the petition to require VRS interoperability because I am frustrated with the different ways to call people on videophone.

I do like 100% use interoperability reason they can contact me and I can contact them

different program like i2eye, sorenson, and etc. I do not like protect and I can't see only

black screen. When I am call to business with phone number or ip address both.

* I don't like that my VRS is blocked and sometimes I have to wait.

I need VRS answer fast reason for emergency to contact hospital, police (911). I not

want wait so long until VRS contact me.

* It is very important to make everyone equally accessible by setting up one system just

like the telephone.

Yes different box i2eye, sorenson, and etc make all match one system inside software.

* The different ways cause stress and can put us at risk. Please make whole video relay

service (VRS) equal with same system.

HOVRS limit hour close at night time. Sorenson open 24 hours. I want all VRS equal

open 24 hours.

I am write:

There have new technology for computer.

Windows www.aim.com need make new update full screen so can see sign language and

update for ip address.

Mac OS X have iChat with full screen that is good and need make update for ip address.

Thank you for this opportunity to make my comment.
